

Working Tasks

Group 1:

Create a public awareness campaign targeted at young people to convince them living a more sustainable life-style. **Make it creative and FUN!**

Group 2:

Create a public awareness campaign to convince the government that the youth wants more green energy from renewable sources and no more coal power plants.

Group 3:

Come up with a method or strategy to measure the carbon footprint for transport to and from your school.

Group 4:

Plan a new mobility / transport concept for your school.
Your aim is to transport the students to and from school as sustainable as possible.

Group 5:

If you were the Major of Windhoek, how would you turn Windhoek into the greenest City of Africa powered 100% by renewable energy?
